## TD Securities Technology Virtual Conference

### Private Companies

#### AlayaCare

Founded in 2014, AlayaCare is a provider of revolutionary cloud-based home and community health care software. With an end-to-end solution that combines traditional in-home and virtual care spanning clinical documentation, back office functionality, client and family portals, financial management, remote patient monitoring, and mobile care worker functionality, AlayaCare offers a platform for agencies to innovate and offer the home care of the future. AlayaCare aims to empower care providers to achieve better health outcomes by delivering transformative technology and data insights to focus on what really matters.

#### AppDirect

AppDirect offers a subscription commerce platform that removes the complexity of building a recurring business model. Customers looking to offer digital services ranging from telecommunications to SaaS – either their own or to resell others – use the AppDirect platform. Customers include Comcast, Vodafone, ADP, Sage. AppDirect recently raised US\$185M of additional growth capital, and to date has raised more than US\$450M that has been invested in organic development and strategic acquisitions. GMV across the platform is more than US\$1B and AppDirect has more than 500 employees across 10 global offices.

#### Coveo

The Coveo Experience Intelligence Platform is a cloud-based platform that uses AI, intelligent search and recommendation technologies to unify disparate content and data, and automate the delivery of millions of relevant and personalized digital experiences for customers, partners, and employees, for many of the world's most admired digital experience leaders. Coveo delivers solutions for Commerce, Service and the Workplace built on the Coveo Experience Intelligence Platform, with Coveo-accredited partners, and through Alliances with Salesforce, ServiceNow, Sitecore and more.

#### Cymax Group

Since its founding in 2004, Cymax has been in the e-commerce business, with a focus on furniture. The company has evolved substantively over the years, growing from an online retailer into a data-rich platform and technology company offering a full design-to-delivery suite of solutions. Currently Cymax operates an online platform for 150+ vendors to sell via its website properties and on third-party marketplaces such as Amazon, Walmart and Best Buy. Cymax also operates a synergistic shipping platform through Freight Club.

#### Dialogue

Founded by a visionary group of entrepreneurs, Dialogue is the leading Canadian virtual care provider pioneering online healthcare services dedicated exclusively to organizations who wish to improve the health and well-being of their members and families. Dialogue's innovative and convenient health and wellness platform provides access to a variety of quality services including primary care, mental health and Employee Assistance Program (EAP) resources to millions of Canadians, offering a multidisciplinary approach and continuity of care. In 2020, Dialogue added hundreds of new employees in 100 days to meet increasing demands for virtual care services in the wake of the global pandemic.

#### eSentire

eSentire is a leading Canadian cybersecurity business. The company is a beneficiary of exponential increases in the number and variety of endpoints on corporate networks. The eSentire MDR (Managed Detection and Response) service is delivered from its proprietary Atlas cloud platform that ingests massive amounts of real-time security signals and applies patented AI complemented by a team of security analysts to proactively stop and contain threats. The company was founded in 2001 and has operations serving more than 650 customers in more than 40 countries.

## TD Securities Technology Virtual Conference

### Private Companies

#### Intelcom Express

Over its successful 30+ year history, Intelcom has provided a platform offering cost efficient and technology-based solutions to the last mile sector of the transportation industry. Beginning in 2015, Intelcom has pioneered an intelligent network and ecosystem in Canada with a network that is serviced by more than 4,000 business partners. As such, Intelcom is able to easily adapt to market fluctuations and brand demands in terms of delivery. Intelcom does business with major companies across Canada, including Amazon.

#### League

Founded in 2014, League started with a vision for the future of healthcare: consumer-centric, personalized, preventative, and always on, to create an open-architecture cloud-based platform that connects disjointed HR tech by providing a single app-based access point for employees to engage with their health and benefits, leading to healthier and happier lives. Enterprise employers in North America spend \$500 billion on employee healthcare, the next major people transformation. League's cloud-based Health Benefits Experience platform leads to better decisions, outcomes and healthcare savings.

#### Softchoice

Softchoice is a leading North American IT solutions and managed services provider. The company combines industry leading services capabilities with an agnostic technology approach to enable digital transformation for customers. Softchoice is the #1 solutions provider in Canada and its renowned expertise includes high growth areas of hybrid cloud, digital workplace transformation, cybersecurity and software asset management. The company is a strategic cloud deployment partner to Microsoft as well as Amazon and Google.

#### Thinkific

Thinkific is a leading software company that makes it easy for a business of any size to create, market, and sell their own customized online courses on Thinkific's cloud based platform. Its mission is to revolutionize the way people learn and earn online by giving them the tools they need to turn their expertise into a sustainable business. Every Thinkific solution was built with students' learning experience in mind so course creators can maximize impact across the entire student journey. To date, Thinkific has helped more than 50,000 entrepreneurs and businesses worldwide earn more than \$650M through online courses.

#### Top Hat

Founded in 2009, Top Hat was created to make education better by tackling the student engagement problem head on. Top Hat is the only all-in-one courseware platform that enables active learning—a proven student-centered teaching pedagogy that promotes deep understanding, critical thinking, and subject mastery—with interactive content, tools, and activities that bring instructors and students closer together. Top Hat has millions of students at 750 leading North American colleges and universities using its solution, and continues to aggressively expand into academic content, providing a viable textbook alternative.

#### TouchBistro

TouchBistro is the #1 iPad POS and integrated payments solution for the hospitality industry, serving as the backbone for more than 25,000 restaurants in more than 100 countries worldwide. The company provides an integrated subscription software platform that manages both customer-facing and back office functions. TouchBistro has been active in releasing new functionality to expand with customers in the current climate, and recently announced the acquisition of TableUp to accelerate development in the loyalty / CRM market.
